# Supporting your cloud journey

MIDEVOPS
SERVICES

**Substituting physical machines with virtual**

Utilising infrastructure components for transitioning from on premise to cloud

amazon web services
Microsoft Azure
openstack
IBM Bluemix™
Google Cloud Platform

**Embracing awareness on cloud**

Enhancing solutions by utilising cloud managed PaaS platform and services

Azure App Service
Amazon RDS
AWS Elastic Beanstalk
Google App Engine

**Shifting focus from managing infra/platform to business**

Embracing server less computing to achieve better control over business logic

AWS Lambda
WebTask.io
Google Cloud Functions
Azure Functions
IBM OpenWhisk

| Lift and shift | Cloud ready | Cloud aware | Containerised microservices | Serverless computing | Cloud native aka distributed computing |

VPC
Azure VNET  Amazon S3  Auto Scaling  Cloud Storage

**Enabling basic cloud capabilities within applications**

Utilising basic set of cloud services such as storage and networking

docker
CF Pivotal Cloud Foundry®
Azure Container Service
Container Engine
MESOS
Amazon ECS
kubernetes

**Containerised applications**

Document management, internationalisation, auditing, publishing, compliance, taxonomy, information rights management, etc.

akka
Orleans
akka.net
Azure Service Fabric
ORBIT

# Managed AWS Cloud Optimization and Support

MIDEVOPS
S E R V I C E S

## How it works?

We are closely cooperating with your AWS Account Manager responsible for your account, we are tracking your progress, discussing how we can further support you in your activities and what programs you might be eligible for so you can save some cash or get some additional credits.
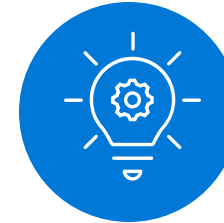

## What you get ?

- **No Planned downtime** - Seamless & un-disturbed account migration
- **Ease of Payment** - 30 days credit period to make the payment from the date of the Invoice
- **Premium Support** - Dedicated Support from OEMs for any cloud related queries etc.)
- **Accountability** -
    o Application tagging and mapping of actual spend, enabling application owner accountability
    o Reconciliation of actual cloud costs back to business case ROI/TCO projections
- **Recommendation** - Alerting of costs anomalies, with recommendations for cost optimization
